HIRING HISTORY

Hiring peaked in 1997 and slowed after 1998

HIRES BY YEAR

28 hires in 1997

23 in 1998, 18 in 1999, and 11 in 2000.

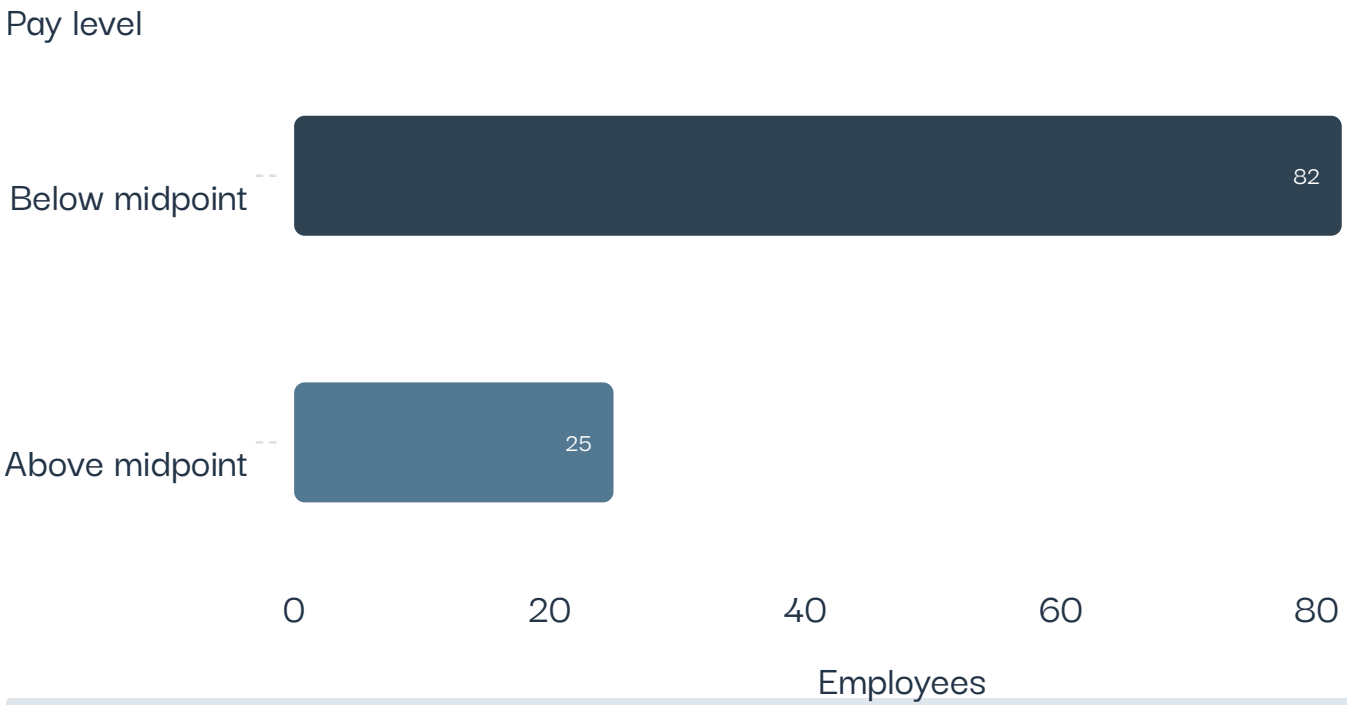

Use the trend as a planning signal, not a forecast: the dataset is a historical sample.

COMPENSATION POSITIONING

Salary positioning deserves review, not automatic correction

PAY-RANGE POSITIONING

82 of 107

sit below the midpoint of their job salary range, about 77%.

35 employees receive commission; **72** do not.

Below-midpoint status is a screening signal—not proof of underpayment. Pair it with experience, performance, scope, and policy.

NEXT DECISIONS

Three actions turn the analysis into HR decisions

ACTION FRAMEWORK

Prioritize compensation review

Start with below-midpoint employees in high-impact roles and compare against tenure, performance, and responsibilities.

Plan by workforce shape

Monitor Shipping capacity, Sales compensation, regional mix, and manager team sizes together.

Operationalize the dashboard

Refresh workforce, payroll, hiring, commission, and salary-band views on a recurring management cadence.

Recommendations are grounded in the project report’s stated objectives and findings.
